SUPERBARS

Professional Heavy Duty Falling and Bucking Bars

Classic solid steel bar with flame hardened rails and precision honed groove

Power plus profile maximizes cutting power and chain speed while reducing damage from loose chain

Large Venturi Oil Hole increases lubrication for longer bar and chain life and reduces oil hole plugging

Available in lengths from 12" to 84"

Motor mounts available for most makes and models of chainsaws

Available in .325", 3/8" or .404" pitch

Replaceable single rivet sprocket nose; replaceable hard nose also available

Available in .050, .058 and .063 gauge

SUPERBAR DURALITE

Reduced Weight Professional Heavy Duty Falling and Bucking Bars

Durability of the SuperBar in a Lighter Weight version

Motor mounts available for most makes and models of chainsaws

Available in 24", 28", 32" and 36" lengths

SUPERMINI BARS

Specifically designed for Narrow Kerf Chain
used on small saws less than 65 cc

Narrow profile for high maneuverability, 1.75" tip diameter; widest point of bar is just 2.5"

Ideal for log home builders, carvers and tree service professionals

Available in lengths from 12" to 32"

Motor mounts available for most makes and models of chainsaws

Available in .325" pitch and 3/8" low profile

Available in .050 and .058 gauge

Replaceable sprocket tip

CANNON SUPERMINI + PRUNING NUMBERING SYSTEM

PRUNING / ARBORIST BARS

Uniquely designed for powered pole pruners
used for pruning fruit, nut and ornamental trees

Unique design helps to eliminate bark damage

Available in 10" and 12" lengths

Available for most popular pole pruning saws

Available in .050 and .043 gauge

www.cannonbar.com

MOUNTING BARS

Drive Chain Guide Bars for Log Wizards
and Other Chainsaw Driven Attachments

Available in 12" and 24" lengths

Available in C1, H1 and S1 motor mounts

Available in .050, .058 and .063 gauge

CARPENTER

Pro User Carpentry Bar for plunge cuts, level cuts and miter cuts
Uniquely designed with a very narrow profile and parallel rails

Ideally suited for timber and log construction

Parallel rails allow for a straight bottom cut, making finishing
and joining easier and more accurate

The narrow profile can be used for making curved cuts

Available in 20", 24" and 28" lengths

C1, H1 and S1 mounts

3/8" pitch, .050 gauge

3/8" low profile, .050 gauge

FIREWOOD PROCESSING BARS

Hard Nose and Sprocket Nose Bars for
Automated Firewood Processing Machines

Solid steel bar with flame hardened rails and
precision honed groove for maximum durability

Available lengths from 16" to 55"

Available in .325", 3/8" and .404" pitch sprocket nose
or hard nose versions

Available in .050, .058, .063 and .080 gauge

RESCUE BARS

Bars for Venting and Rescue Saws

Available in lengths of 16" and 20"

Available for many brands of Rescue Saws, including Stihl,
Cutter's Edge, Team, and others

3/8" pitch and 404" pitch / .058 and .063 gauge

Replaceable sprocket nose

Replaceable hardnose also available

CARVING BARS

For applications from wood carving to log home building
Small Nose Cobalt tipped bars for carving and fine detail cutting

ARBOR TIP

Carving tips are reinforced with a custom cobalt alloy providing even more endurance

TOONIE TIP

Available in lengths from 8" to 28"

QUARTER TIP

Available in C1, H1 and S1 mounts
Dime tip available in C1 mount only

DIME TIP

Available in .050 and .043 gauge

COMPETITION

Hotsaw Fat Belly Racing Bars
"The racing bar of champions"

Standard and hotsaw mounts available; custom mounts crafted to order

Available with 2.8" roller nose

Many lengths available, or custom made to your needs

Available in standard .063 gauge; .050 and .058 upon request

Available in 3/8" and .404" pitch

Cobalt inlay at nose and tail for extreme racing conditions

www.cannonbar.com

CANNON® Adaptor Plates

These handy adaptors allow the operator to use the same bar on many different saw makes

Dealers need only stock one bar mount to service most popular saws

The adaptor fits snugly in the bar slot and for most saws, the plate screw secures it to the saw (with the exception of CBW-20040, CBW20090, CBW-20095)

CBW-20040

S1 to C1 Stihl 12 mm bar mount to Echo 8 mm bar mount
36 mm center to center bar studs
Fits Echo CS-450/P, CS 490, CS-500P, CS-530, CS550-P

CBW-20060

S1 to H1 Stihl 12 mm bar mount to Husqvarna 9 mm bar mount
30 mm center to center bar studs
Also fits most Dolmar/Makita 9 mm mount saws

CBW-20020

S1 to H1 Stihl 12 mm bar mount to Husqvarna 9 mm bar mount
38 mm center to center bar studs
Fits Husqvarna 562XP

CBW-20030

S1 to H1 Stihl 12 mm bar mount to Husqvarna 9 mm bar mount
44 mm center to center bar studs
Fits most Husqvarna 9 mm mount saws

CBW-20090

S1 to H1 Stihl 12 mm bar mount to Husqvarna 9 mm bar mount
46 mm center to center bar studs
Fits Husqvarna 3120

CBW-20050

S1 to P4 Stihl 12 mm bar mount to Echo 8 mm bar mount
40 mm center to center bar studs
Fits most Echo saws

CBW-20035

G1 to H1 Stihl 14 mm bar mount to Husqvarna 9 mm bar mount
44 mm center to center bar studs
Fits most Husqvarna 9 mm mount saws * For Milling Bars only

CBW-20095

G1 to H1 Stihl 14 mm bar mount to Husqvarna 9 mm bar mount
46 mm center to center bar studs
Fits Husqvarna 3120 * For Milling Bars only

CBW-20080

G1 to S1 Stihl 14 mm bar mount to Stihl 12 mm bar mount
35 mm center to center bar studs
Fits all Stihl 12 mm mount saws * For Milling Bars only

*** All G1 Mount Adaptor Plates are meant for use on Double Ended Milling Bars which require an Auxiliary Oiler Kit and Helper Handle with Roller, unless used with two powerheads**

www.cannonbar.com

DOUBLE ENDED MILLING BARS

Double ended bars for
Chainsaw Powered Lumber Mills

Can be used with two powerheads or one powerhead with a helper handle (sold separately)

Available in lengths from 44" to 144"

Universal G1 motor mount fits most common large saws

Available in standard .063 gauge; .050 and .058 upon request

Adaptors supplied to accommodate different bar stud sizes

OILER KIT

HELPER HANDLE

PACKAGE CUTTING BARS

Double Ended Bars for Packaging and Bundle Cutting Saws
such as L-M and Holtec

Used on packaging and bundle cutting saws by shake and shingle, pallet and fencing companies

Available in lengths of 60" to 108"

.404" pitch / .063 gauge; .404" pitch / .080 gauge; 3/4" pitch / .122 gauge

The .063 and .080 bars feature flame hardened rails; can be rebuilt up to six times at a fraction of the cost of a new bar

The .122 gauge bars are made from special titanium material for durability and wear resistance, that work hardens with use

* Refer to **CANNON Motor Mount Crossover Guide**

HARVESTER 750

For Mechanized Log Harvesting and Processing

Made from special titanium material for durability and wear resistance, that work hardens with use

Work hardening penetrates deep to allow for several rebuilds

Available in lengths from 17" to 50"

Motor mounts available for a variety of common harvesting heads

3/4" pitch, .122 gauge

Replaceable sprocket nose

HARVESTER 404

For Mechanized Log Harvesting and Processing

Power plus profile maximizes cutting power and chain speed while reducing damage from loose chain

Available in lengths from 21" to 46"

Motor mounts available for a variety of common harvesting heads

.404" pitch, .080 gauge

Replaceable sprocket nose

SLASHING BARS

Double Ended Bars for Mechanized Cutting

Precision honed and centered grooves facilitate the chain riding square to the rail, resulting in smoother and straighter cutting

Available in lengths from 44" to 96"

Motor mounts available for a variety of slasher heads

3/4" pitch, .122 gauge

www.cannonbar.com

What Makes **CANNON®** *"The Best Bar - Bar None!"®*

All *Cannon Bars* are made from high grade, custom formulated, cold rolled and annealed steel, that has extra chromium for wear resistance and extra molybdenum for strength.

"The Best Bar - Bar None!"® NEEDS THE BEST STEEL TO MAKE IT LAST

From the raw steel, each bar is precisely **WATER JET CUT**, so that there are no Heat Affected Zones (HAZ).

Once the steel is cut, it is **HEAT TREATED**, oil quenched and press tempered to achieve just the right hardness for strength, durability, toughness and flexibility.

The hardened bars are carefully **STRAIGHTENED** and **SURFACE GROUND** to the ideal thickness.

Next, surface ground bars are **CNC MILLED**, leaving little margin for error. Different milling patterns are cut, depending on the style of tip that the bar is fitted with.

Once a bar is milled, it is put into the hands of our **MASTER BARMEN**, who give it Cannon's claim to fame, the **PRECISION HONED GROOVE**. Every bar has a true and centered groove that is accurate to within .003" of the desired gauge. It is this care, attention and skilled workmanship that really makes our bars stand out against the competition.

Next is the rail hardening. Using a proprietary **FLAME HARDENING PROCESS**, the bar rails are hardened to 5 points more than the tie straps on most models and brands of chain. This special hardening process penetrates much deeper than electric induction hardening and results in much longer bar rail life.

Longer bars are then **HEEL PRESSED** in order to reduce vibration and prevent premature cracking from vibration.

The bars are put through a **STRESS RELIEVING SYSTEM** in order to expel tension that builds up in the bars through all of the different processes. This step realigns the molecular structure to ensure that the bars will not be stressed and prone to premature cracking.

Finally the bars are ready for the finishing touches. Cannon applies the attractive brushed **GUNMETAL FINISH** to most of the bars. Some longer lengths and specialty bars still have Cannon's classic matte black painted finish. The bars are engraved with our identifying numbers and silk screened with our logo. They are now ready to be tipped, put through our **FINAL QUALITY ASSURANCE TESTS**, packaged and shipped to the customer.

There you have it, all the steps taken to ensure you are **GETTING...**

"The Best Bar - Bar None!"®

LIFETIME WARRANTY

Cannon Bar Works Ltd. warrants its products to be free from defects in material or workmanship for as long as they are owned by the original end use purchaser. Cannon chainsaw bars are not warranted against improper maintenance or user abuse, including but not limited to, damage caused by improperly tensioned chain and normal metal fatigue. This warranty is limited to repair or replacement of the product, solely at the discretion of CannonBar Works Ltd. and specifically excludes compensation for consequential or indirect damages of any kind whatsoever.
